(B) = Book Reviews

α_2-macroglobulins. Turnover in the nephrotic syndrome, 308
$A_m{}^h$ Phenotypes. Further observations on, 457
A and B antigen sites. Quantitative measurements concerning, 321
ABO blood groups and Thyrotocicosis, 143
–, determination of in blood stains on textiles, 312; 317
– erythroblastosis. Pathogenesis of, 145
Absorption study, of monospecific lymphocytotoxic antisera, 173
A.C.D. Favorable effect of, on viability of platelets, 90
Adherence, immune. Nature of the receptor, 43
–, – and blood cell destruction, 361
–, – of sensitized leucocytes and skin fibroblasts, to the surface of indicator cells, 374
Adhesiveness, platelet, to glass. Effects of Dipyridamole on, 300
Ag serum system. Lack of linkage with Lp, 71
– (x). Further family data, 225
Agglutination, by immunoantibodies, 241
Agglutinins, α and β. Absorption from Anti-D grouping sera using formalised, heat-treated cells, 75
–, cold, anti-i, in alcoholic cirrhosis, 227
–, saliva, and crossreacting antibody, 340
Alcoholic cirrhosis, cold anti-i agglutinins in, 227
Alloimmune antibodies, human. Cytotoxic effect of on epidermal cells, 295
Anaemia, autoimmune haemolytic. Delayed haemolytic transfusion reactions simulating, 32
Anti-Co^a, a new red cell antibody, 18
– -D grouping serum. Absorption of α and β from, 75
– -D. Amount of on red cells in H.D.N., 279
– -K_e, a new reagent in pigs, 286
– -Kl. A further naturally occurring, 305
– -Ld(a)-Serum. The precipitin in, 231
– -N^b and anti-N_c in pigs, 215
– -Xg^a, auto. First example of, 138
Antibody, a new red cell (anti-Co^a), 18
–, crossreacting, and saliva agglutinins, 340
–, incomplete, for red cells, in salmon caviar, 465
–, a nebulous (chido), causing cross-matching difficulties, 140
Antibodies, 2 new, in pigs (anti-N_b and anti-N_c), 215
–, enzyme-reacting specific auto-. In individuals apparently without haemolytic anaemia, 429
–, human alloimmune. Cytotoxic effect of on epidermal cells, 295
–, immune. Agglutination by, 241
Anticomplement Coombs Test. Relationship of, to the classes of immunoglobulins, 401
Antigen, a new blood group (Sul), 221
Antigen sites. A and B. Quantitative measurements concerning, 321
Antigens, leucocyte, and the mixed lymphocyte culture reaction, 186
Antiglobulin reaction. Inhibition of by human yG-immunoglobulin, 132
– test, direct. In hypertensive patients, 273
Antisera, monospecific lymphocytotoxic. An absorption study, 173
Auto-anti-Xg^a. First example of, 138
– -antibodies, enzyme-reacting. In individuals apparently lacking haemolytic anaemia, 429

β1C globulins, in renal glomeruli of mice, 329
B_h-like human type. A new, 354
Blocking, of complement fixation, by rheumatoid factor, 199
Blood cell destruction. Immune adherence and, 361
– coagulation, hemorrhage and thrombosis, 239 (B)
– group chimerism, 161
– – system, N, in pigs. Two new antibodies, 215
– groups, ABO, and thyrotoxicosis, 143
– stains, on textiles. Method of determining ABO groups of, 312; 317
–, stored. Caryogrammes from, 293
– type, human. A new B_h-like, 354
Bone marrow therapy. Proceedings of International Symposium on, 157 (B)

Caryogrammes, from stored blood, 293
Caviar, salmon. An incomplete antibody to red cells in, 465
Cells, red (see Red)
Cells, white (see White)
–, epidermal (see Epidermal)
Chemical protection, in irradiated primates, 157 (B)

Chido, an antibody causing cross-matching difficulties, 140
Chimerism, blood group, 161
Cirrhosis, alcoholic, cold anti-i agglutinins in, 227
Coagulation and transfusion in clinical medicine, 240 (B)
Cold agglutinins (see Agglutinins)
Complement fixation by thrombocyte iso-antibodies. Blocking effect of rheumatoid factor on, 199
Coombs Test, anticomplement. Relationship of to the classes of immunoglobulins, 401
Cross-matching difficulties, caused by the Chido antibody, 140
Culture, mixed lymphocyte, and leucocyte antigens, 186
Cytological differentiation of foetal and adult erythrocytes. A new method for, 234
Cytotoxic effect, of human alloimmune antibodies on epidermal cells, 295
– leucocyte iso-antibodies, and immune adherence, 374

Destruction, blood cell, and immune adherence, 361
Differentiation, cytological, of foetal and adult erythrocytes. A new method for, 234
Direct Antiglobulin Test in hypertensive patients, 273
Dolichos biflorus lectin. Effect of root environment on, 68
Dipyridamole. In vitro effect of, on platelet adhesiveness to glass, 300

Environment, plant root. Effect of on *Dolichos biflorus* lectin, 68
Enzyme-reacting specific autoantibodies in individuals apparently without haemolytic anaemia, 429
Epidermal cells. Cytotoxic effect of human alloimmune antibodies on, 295
Erythroblastosis, ABO. Pathogenesis of, 145
Erythrocytes, foetal and adult. New method for cytological differentiation of, 234
–, gelatine-coated. Two-component system of human serum agglutinating, 443
–, neonatal. Power of combining with antibody, 145
–. Reactions of papain-sensitive and non-sensitive IgG with, 252
Exchange Transfusion. Effect of on the development of immunological factors, 118

Factors, immunological. Effect of exchange transfusion on the development of, 118
Family data, further, on Ag(x), 225
Fibroblasts, skin. Immune adherence to surface of indicator cells, 374
Formalised cells. Use of to absorb anti-D grouping sera, 75

γG and β1C globulin. Presence of in renal glomeruli of mice, 329
Gc types and haptoglobins in Haida Indians, 151
Gelatine-coated erythrocytes. Agglutination of, 443
Glass, platelet adhesiveness to. Effect of Dipyridamole on, 300
Globulins, γG and β1C, in renal glomeruli of mice, 329
Gm typing, with microtiter plates, 319
Greffe, la. Aspects biologiques et cliniques (MATHÉ et AMIEL) 157 (B)
Grouping serum, anti-D. Absorption of α and β from, 75

Haemolytic Anaemia (see Anaemia)
– Disease of the Newborn. Rh antibody type in 81
– – – –. The amount of anti-D on red cells in, 279
Haida Indians. Haptoglobin and Gc types of, 151
'Der Hämolytische Transfusionszwischenfall' (WILLENEGGER *et al.*), 158 (B)
Haptoglobin and Gc types in Haida Indians, 151
Haptoglobins, a revised staining procedure for, 78
Hawaii. Further examples of Jk(a–b–) blood in, 154
Heat-Treated cells. Use of to absorb anti-D Rh grouping sera, 75
'Hemoglobin, its precursors and metabolites' (Sunderman and Sunderman) 158 (B)
Hemopexin system in pigs. A new allele in, Hp^4, 397
Hypertensive patients. Direct Antiglobulin Test in, 273

IgG, human. Reaction with erythrocytes, 252
Immune adherence (see Adherence)
– antibodies. Agglutination by, 241
Immunofluorescent technique. Use of to demonstrate combining power of neonatal erythrocytes, 145
Immunoglobulin, human γG. Inhibition of the antiglobulin reaction by, 132

Immunoglobulins, classes of. Relationship of the anticomplement Coombs Test to, 401
Immunisation, antenatal Rh. Effect of external version on, 390
Immunological factors. Effect of exchange transfusion on development of, 118
– Methods. (Ed. Ackroyd), 160 (B)
Indicator cells. Immune adherence of sensitised leucocytes and skin fibroblasts to, 374
Inhibition, of the antiglobulin reaction by yG immunoglobulin, 132
Interaction, non-specific, of papain-sensitive and non-sensitive human IgG with erythrocytes, 252
Irradiation, and irregular transmission of blood group complex in pigs, 25
Isoantibodies, thrombocyte. Complement fixation by, and the rheumatoid factor, 199
– –, cytotoxic leucocyte. Immune adherence of leucocytes and skin fibroblasts sensitised by, 374

Jk(a–b–) blood. Further example of, in Hawaii, 154

K blood group system in pigs. A new reagent in, 286

Lp serum system. Lack of linkage with Ag, 71
Lectin, *Dolichos biflorus*. Effect of root environment on, 68
Lectins, from *Maclura pomifera*, 211
Leucocyte antigens, and the mixed lymphocyte culture reaction, 186
Leucocytes and skin fibroblasts, sensitised. Immune adherence of, 374
Linkage, lack of, between Lp and Ag serum systems, 71
Lipoproteins, low density, human, 2(Edit.)
Lymphocytotoxic antisera, monospecific. An absorption study, 173

Maclura Pomifera. Lectins from, 211
Mice, aging and neonatally irradiated. yG and 1C globulin in renal glomeruli of, 329
Microtiter plates. Gm typing with, 319
MN system. A new antigen in (Sul), 221
Mollusc extract. Studies on, using salivas, 461

Neonatal erythrocytes (see Erythrocytes)
Nephrotic syndrome. Turnover of α_2 macroglobulins in, 308
Newborn, haemolytic disease of the. Rh antibody type in, 81

O_m^h phenotypes. Further observations on, 457
Oncotic efficiency of plasma substitutes. Determination of, 106
Osmometer, a simple concentration. Use of to determine oncotic efficiency of plasma substitutes, 106
Ox red cells of different agglutinability, 420

Phenotypes A_m^h and O_m^h. Further observations, 457
Pigs. A new allele in the Hemopexin system of, 397
–. Two new antibodies in the N blood group system of, 215
–. A new reagent in the K blood group system of, 286
–. Irregular transmission of a blood group complex in, following irradiation, 25
Plasma substitutes. Determination of oncotic efficiency of, 106
Platelet adhesiveness to glass. Effects of Dipyridamole on, 300
Platelets, human. Favourable effect of A.C.D. on viability of, 90
Polymorphisms, of the human low-density lipoproteins, 2 (Edit.)
Precipitin, in Anti-Ld(a) Serum, 231
Progress in allergy (Vol. 8), 240 (B)
– – Haematology (Vol. IV), 239 (B)

Quinidine or Quinine, as cause of thrombocytopenia, 265

Reactions, haemolytic transfusion, simulating auto-immune haemolytic anaemia, 32
Reactions, mixed lymphocyte culture, and leucocyte antigens, 186
Receptor, immune adherence. Nature of, 43
Red cells. Amount of anti-D on, in H.D.N., 279
– –, an incomplete antibody for, in salmon caviar, 465
Red cells, ox, of different agglutinability, 420
– –, time-expired, formalised, heat-treated. Use of to absorb anti-D grouping sera, 75
Renal glomeruli, of mice. yG and β1C globulins in, 329

Rh antibody type in H.D.N., 81
– immunisation, antenatal. Effect of external version on, 390
Rheumatoid factor. Blocking effect of on complement fixation, 199

Saline solutions, hypotonic. Differential lysis with, to isolate sheep white cells, 467
Saliva agglutinins and cross-reacting antibody, 340
Salivas. Studies on a mollusc extract, using, 461
Salmon caviar. An incomplete antibody to red cells in, 465
Sera, grouping (see Grouping)
Serum system, Ag and Lp. Lack of linkage between, 70
Sites, Antigen (see Antigen)
Staining procedure, revised, for Haptoglobins, 78
Stored blood. Caryogrammes from, 293
Substitutes, Plasma (see Plasma)
Sul, a new antigen in the MN blood group system, 215
System, a two component, of human serum, agglutinating gelatine-coated erythrocytes, 443

Technique, immunofluorescent (see Immunofluorescent)
Textiles. Method of determining ABO group of blood stains on, 312; 317
Thrombocyte iso-antibodies, fixation by. Blocked by rheumatoid factor, 199
Thrombocytopenia due to Quinidine or Quinine, 265
Thyrotoxicosis, and ABO blood groups, 143
Transfusion, exchange (see Exchange)
– reactions (see Reactions)
Transmission, irregular, of a blood group complex in pigs, 25
Two-component system, of human serum, agglutinating gelatine-coated erythrocytes, 443

Variations, quantitative, in power of neonatal erythrocytes to combine with antibody, 145
Version, external. Effect of on antenatal Rh immunisation, 390
Viability of human platelets. Favourable effect of ACD on, 90

White cells, sheep. Isolation of, 467

SOCIETY TRANSACTIONS

XXIst Scientific Meeting of the Protein Foundation, Cambridge, Mass., 1966 32
Book Reviews 207
Errata 288
News Items 128, 366
Index Rerum ad Vol. 13 516
Index Nominum ad Vol. 13 519

Index rerum ad Vol. 13

(B) = Book Reviews; (S) = Society Transactions

Abnormalities, multiple phenotypic, and Rh_{null} (—/—), 18
ACD blood. Preparation of platelet concentrates from, 119 (S)
Acid phosphate variants, red cell. Distribution of in Vienna, 11
Acidity, comparative, of blood collected in ACD and CPD solutions, 107 (S)
Activity, biologic, *in vivo*. In rats, 49 (S)
Adipose tissue extracts. Administration of in adrenalectomised rats, 40 (S)
Ag(x) and (y). Distribution of, 1
– in Japanese, 319
Aging. And intravenous administration of immunoglobulins, 57 (S)
Agglutinators, serum, of enzyme-treated erythrocytes, 233
Agglutinogens, dog. Preservation of in liquid nitrogen, 27
Agglutinin, non-specific cold, anti-i, 4
– s, two incomplete, in rabbit antisera to gum arabic, 218
Analysis, gel-filtration. To examine bovine blood-typing antibodies, 263
Antagonist, insulin, associated with serum albumin, 37 (S)
Anti-Ag, non-precipitating, 508
– – sera, in immunodiffusion, 327
– – (b) and (t) reagents. Relation between, 21
– -Di^b. First and second examples, 314
– -E antibodies, disclosed 1960–1966, 446
– -Ge as a transfusion problem, 23
– -H reagents, lectin. Comparison of, 357
– -Hemophilic factor. Cryoprecipitation of, 118 (S)
– -Henshaw. First example in human serum, 346
– -i, non-specific cold. Identification of, 4
– -IB. Detecting a joint product of the I & B genes, 144
– -J, anti-R, and pig anti-A, and human A cells, 181
– -5b Leuco-agglutinins, 187
– -leukocyte serums, human. Hemagglutination by, 461
– -Le^a. Associated with rabbit antisera to gum arabic, 218
– -Sd^a. A new antibody, 493
– -Xg^a, auto. Further studies, 15
Antibody content. Of a new preparation of human gammaglobulin, 85 (S)
Antibodies, anti-Rh, enzyme-digested. To sensitise erythrocytes, 233
–, cytotoxic hetero-. And antigens on human granulocytes and lymphocytes, 194
Anticoagulant solution, CPD, 106 (S)
– – s, ACD and CPD. Comparative acidity of blood collected in, 107 (S)
Antigen, D^u. Depressant effect of the Cde-antigen on, 423
–, red cell, At^a, 444
–, a rare blood group, Jn, 165
–, a new blood group, Sd^a, 485
–, Xh. Species variations within, 29
– s, A and H. On leucocytes, 362
– s, Ag (x) and (y). Distribution of, 1
–, weak c and E. An Rh complex producing, 417
–, cell-specific, on human granulocytes and lymphocytes, 194

B blood group, a weak (B_v). In a Finnish family, 511
Blood donations, Rh (D^u), in Scotland, 431
– glucose. Relationship of serum insulin to, 35 (S)
– group system, Yt. Studies on, 171
– – substance, A. Suppression of, 285
– platelet microtubules, lability of, 502
– platelets. Physiology of, 207 (B)
Bovine blood typing antibodies. Examination by gel-filtration, 263
Bridge, disulphide. Of neurohypophyseal hormones, 46 (S)
Bromelin. Binding of, by erythrocytes, 393

CDP blood. Preparation of platelet concentrates from, 119 (S)
– solution, anticoagulant, 106 (S)
– –. Further evaluation of, 114 (S), 126 (S)
– – and other variables. Effect of on cryoprecipitation of antihemophilic factor, 118 (S)
– – s, 2, 3, and 5. 28-day survival of blood collected in, 109 (S)
Cells, human, group A. Reaction of anti-J, anti-R, and pig anti-A with, 181

Cells, white. Isolation of from sheep blood, 281
–, Coombs-positive, anti-I sensitised. Fluates from, 472
Changes, metabolic. In red cells of blood stored in different preparations, 113 (S)
Chromosome, Cde. Depressant effect of on the D^u antigen, 423
Cold-agglutinin, anti-i, 4
Congress, Xth, Int. Soc. Haem., 207 (B)
Cryoprecipitation of antihemophilic factor. Effects of variables on, 118 (S)

Depressant effect of Cde on D^u, 423
Destruction, membrane. In P.C.H., 308
Determinants, genetic (Gm), of γ_{2c} IgG immunoglobulin, 369
Diabetic subjects. Free and bound insulin in, 50 (S)
Disulphide bridge of neurohypophyseal hormones, 46 (S)
Dog agglutinogens. Preservation of in liquid nitrogen, 27

Endocrine metabolism. And nutrition, 56 (S)
Enzyme-digested anti-Rh antibodies. Sensitising erythrocytes, 233
Erythrocytes, cord blood, polyagglutinable, 225
–, sensitised. Serum agglutination of, 233
–. Binding of bromelin by, 393
Extracts, adipose tissue. *In vivo* administration of in adrenalectomised rats, 40 (S)

Finnish family. A weak B group (B_v) in, 511
Fluates from anti-I sensitised Coombs-positive cells, 472

Gamma globulin. Comparison of 27 batches, 90 (S)
– –, human. Stability of, 59 (S)
– –, –. Antibody content of a new, 85 (S)
– –, intravenous, 84 (S), 102 (S)
– –. Preparation of for intravenous use, 103 (S)
– – s. Standard, pH-4, and desaggregated, 93 (S)
Gene complex, *cD*-. In a Negro family, 354
– –, *D*(*c*)(*E*). Demonstration of, 158
– –, Rh, producing weak c and E antigens, 417
Genes, I and B. An antibody detecting the joint product of, 144
Glucose, blood. Relationship of serum insulin to, 35 (S)
Gm determinants of γ_{2c} IG immunoglobulins, 369
Golden hamster. Effect of thymectomy on, 129
Granulocytes, human. Antigens on, demonstrated by cytotoxic antibodies, 194
Gum arabic. Rabbit sera against, and anti-Le^a, 218

Hemagglutination methods, passive. Ag sera in, 327
–, by human anti-leucocyte serums, 461
Heteroantibodies, cytotoxic, demonstrating antigens on human granulocytes & lymphocytes, 194
Hormones, neurohypophyseal. Disulphide bridge of, 46 (S)
Human anti-leukocyte serums. Hemagglutination by, 461
– gamma globulin. Studies on the stability of, 59 (S)
– group A cells. Reaction of anti-J, anti-R and pig anti-A with, 181
– red cells. Biological test for injury to, 270
– serum. First example of anti-Henshaw in, 346

Immune serum globulin solutions. Instability of, 57 (S)
– – –, plasmin-treated. For intravenous use, 71 (S)
– – – s. Fragmentation of venous and placental, 59 (S)
Immunodiffusion. Anti-Ag sera in, 327
Immunoglobulin, G. Radioimmunoassay of human urinary, 349
–, IgG. Gm determinants of γ_{2c} subclass of, 369
– s. Intravenous administration of, and aging, 57 (S)
Incomplete agglutinins in rabbit antisera to gum arabic, 218
Injury to human red cells. Biological test for, 270
Insulin, tertiary relationships required, 32 (S)
–, bound. Effect of on crystalline insulin in perfused rat heart, 37 (S)
–, –. In rats, 49 (S)
–, free and bound. In normal and diabetic subjects, 50 (S)
–, immunologically reactive. In parotid saliva, 54 (S)
–, serum. Relationship of to blood glucose, 35 (S)

Insulin. In vascular and extravascular compartments, 54 (S)
International Society of Haematology. X Congress, 207 (B)
Investigations, electron microscopic, of bromelin binding by erythrocytes, 393
–, complex serological, involving LW, 406
Isolation of white cells. Method for, 281

Japanese. Serum Lipoprotein allotypes Ag(x) and (y), 319
Jn^a, a rare blood group antigen, 165

Lability of blood platelet microtubules, 502
Lectin anti-H reagents. Comparison of, 357
– s. Immunochemical studies on, I and II, 209, 449
Leuco-agglutinins, anti-5b, 187
Leucocyte count in rats. Effect of hemagglutinin on, 467
– s. A and H antigens on, 362
Lipoprotein allotypes, serum. In Japanese, 319
– s, plasma. Studies on, 57 (S)
Liquid nitrogen. Preservation of dog agglutinogens in, 27
LW. Complex serological investigations involving, 406
Lu(a–b–). An additional example, 441
Lymphocytes, human. Antigens on, and cytotoxic antibodies, 194
Lysis, differential, to isolate sheep white cells, 281

Membrane destruction in P.C.H., 308
Metabolism, endocrine. And nutrition, 56 (S)
Microtubules, blood platelet. Lability of, 502
Mixed leucocyte reaction in inbred strains of rats, 7

Neurohypophyseal hormones. Disulphide bridge of, 46 (S)
Nutrition. And endocrine metabolism, 56 (S)

P.C.H. Membrane distruction in, 308
Phenomenon, the Ogata, 472
Phenotypic abnormalities, multiple, associated with Rh_{null}, 18
Phosphate, serum alkaline. Variants of, 289
Physiology of blood platelets. The, 207 (B)
Phytohemagglutinin. Effect of on the leucocyte count in rats, 467
Plasma lipoproteins. Studies on, 57 (S)
Platelet concentrates. Preparation of from ACD and CPD blood, 119 (S)
Polyagglutinable cord blood erythrocytes, 225
Preservatives. Metabolic changes in red cells stored in different, 113 (S)
Protein, hemagglutinating. Of *Sophora japonica*, 209

Radioimmunoassay of human urinary immunoglobulin G, 349
Rat heart. Effect of bound insulin on, 37 (S)
– s, inbred strains of. Mixed leucocyte reaction in, 7
– s, adrenalectomised. Administration of adipose tissue extracts in, 40 (S)
– s. *In vivo* activity of bound insulin in, 49 (S)
–. Effect of phytohemagglutinin on the leucocyte count in, 467
Reaction, mixed leucocyte. In inbred rats, 7
Reagents, anti-Ag(b) and (t). Relations between, 21
–, lectin anti-H. Comparison of, 357
Red cell antigen. A very frequent, At^a, 444
– – acid phosphatase variants in Vienna, 12
– – s. Stored in different preservatives, 143 (S)
– – s, human. Biological test for injury to, 270
Relationships, tertiary. Necessary for biological activity of insulin, 32 (S)
Rh (D^u) blood donations in Scotland, 431
Rh_{null} (—/—). Multiple phenotypic abnormalities associated with, 18
– gene complex D(c)(E). Demonstration of, 158
– – – cD- in a Negro family, 354

Saliva, parotid. Immunologically reactive insulin in, 54 (S)
Scotland, Rh (D^u) blood donations in, 431
Secretion of blood group substance A. Suppression of, 285
Sd^a. A new blood group antigen, 485
–. A new blood group antibody, 493
Serum alkaline phosphatase. Variants of, 289
– globulins, immune. Fragmentation of, 59 (S)
– – –. Preparation of plasmin-treated for intravenous use, 71 (S)
– insulin concentration. And immunologically reactive insulin, 54 (S)

Sheep. Three new phenotypic systems in blood of, 246
–. Isolation of white cells from blood of, 281
Solution, anticoagulant, CPD, 106 (S)
– s, anticoagulant, ACD and CPD. Comparative acidity of blood stored in, 107 (S)
–, immune serum. Instability of, 57 (S)
–, hypotonic saline. Use of to isolate sheep white cells, 281
Sophora japonica. Hemagglutinating protein of, 209
Specificity, unusual, of fluates from anti-I sensitised Coombs positive cells, 472
Suppression of blood group A substance, 285
Systems, three new phenotypic, in sheep blood, 246

Test, biological, for injury to the human red cell, 270
Thymectomy. Effect of on the golden hamster (*Mesocricetus auratus*), 129
Transformation, T. Prenatal, 225
Transfusion problem. Anti-Ge as, 23

Variants, genetically determined, of serum alkaline phosphatase, 11, 289
Variations, inter- and intra-species, within the Xh antigen, 29
Weak B blood group (B_v) in a Finnish family, 511
White cells. Method for isolation of, 281

Xh antigen. Species variations within, 29

Yt blood group system. Studies on, 171
